

(2)

The region \mathbf{R} , shown shaded in the diagram, is bounded by three straight lines.

(Total for Question 11 is 4 marks)

(2)

DO NOT WRITE IN THIS AREA

12 The diagram shows two congruent isosceles triangles and parts of two congruent regular polygons, X and Y.

Diagram **NOT** accurately drawn

The two regular polygons each have n sides.

Work out the value of *n*.

n =

(Total for Question 12 is 3 marks)

Diagram **NOT** accurately drawn

The diagram shows a prism *ABCDEFGH* in which *ABCD* is a trapezium with *BC* parallel to *AD* and *CDEF* is a rectangle.

 $BC = 7 \,\mathrm{cm}$ $AD = 12 \,\mathrm{cm}$ $DE = 10 \,\mathrm{cm}$

The height of trapezium *ABCD* is h cmThe volume of the prism is 608 cm^3

Work out the value of *h*.

(Total for Question 13 is 3 marks)

h =

14 Max kept a record of the marks he scored in each of the 11 spelling tests he took one term.

Here are his marks.

Find the interquartile range of the marks.

15 (a) Complete the table of values for $y = x^2 - \frac{x}{2} - 3$

x	-3	-2	-1	0	1	2	3
У	7.5				-2.5		4.5

15

16 Cody has two bags of counters, bag A and bag B.

Each of the counters has either an odd number or an even number written on it.

There are 10 counters in bag **A** and 7 of these counters have an **odd** number written on them. There are 12 counters in bag **B** and 7 of these counters have an **odd** number written on them.

Cody is going to take at random a counter from bag A and a counter from bag B.

(a) Complete the probability tree diagram.

(b) Calculate the probability that the total of the numbers on the two counters will be an odd number.

(3)

Harriet also has a bag of counters. Each of her counters also has either an odd number or an even number written on it. Harriet is going to take at random a counter from her bag of counters. The probability that the number on each of Cody's two counters **and** the number on Harriet's counter will all be even is $\frac{3}{100}$

(c) Find the least number of counters that Harriet has in her bag. Show your working clearly.

DO NOT WRITE IN THIS AREA

(3)

(Total for Question 16 is 8 marks)

17 Some students in a school were asked the following question.

"Do you have a dog (D), a cat (C) or a rabbit (R)?"

Of these students

- 28 have a dog
- 18 have a cat
- 20 have a rabbit
- 8 have both a cat and a rabbit
- 9 have both a dog and a rabbit
- *x* have both a dog and a cat
- 6 have a dog, a cat and a rabbit
- 5 have not got a dog or a cat or a rabbit
- (a) Using this information, complete the Venn diagram to show the number of students in each appropriate subset.

Give the numbers in terms of *x* where necessary.

(3)

Given that a total of 50 students answered the question,

(b) work out the value of *x*.

(2)

x =
